

Tubing Simplified.

- 1: Arrive 30 mins early to your chosen departure time.
- 2: Have everyone change clothes if needed. It is best to show up dressed for the river.
- 3: Have group leader come in with **signed waivers** to check-in. No need for the entire group to enter the shop.
- 4: Ask your group to assemble in front of the shop ready to go. You will be ask to divide into groups of 10 -14, you may want to take care of this before arrival. Kids you know.?
- 5: Load up for departure. The ride in the van is 15 minutes to our put-in. Along the way your driver/Tube specialist will show you where the take-out is and all the cool spots to hang out and swim and other do's and don'ts.
- 6: We have arrived! First thing everyone out of the van and assemble in the grass NOT in the road. Guides will start handing out tubes, every one grab a tube.
- 7: Once on the river relax, float and have a great time. Normal float time is roughly 2 hrs, however there is no rush. If the float takes 3 hours so be it.

Take-Out/Pick Up:

Each person should hang on to his or her tube. Rinse tube off and remove any collected rocks(it happens alot) before carrying tube to the van. **Please do not drag tubes** through the sand or the road.

Ride back to our outpost is 5 minute.

Unload, change clothes and hang out if you like. We have plenty of room for frisbees, ball throwing and just running around.
